cendoor

From one post to a delivered order

The seller journey, step by step: what you do, what the customer does, what Cendoor does.

You · Customer · Cendoor (AI)

SET UP · ABOUT 10 MINUTES, ONCE

1 You

Create your account

Free for 14 days. No card. Arabic, French or English.

30 seconds

2 You

Tell the AI what you sell

Type or speak, add photos and prices. Say how you want it to look.

In your own words

3 Cendoor (AI)

Your shop appears

A website made for you, with your photos, products, delivery and stock. Change anything by chatting.

Not a template

4 You

Share one link

Put it in your bio, stories and WhatsApp status. One tracked link per post shows what sells.

You keep posting

SELL AND DELIVER · EVERY DAY

5 Customer

A customer orders

From your link or by chatting on WhatsApp. Cendoor answers in Darija, French or Arabic, day and night.

No missed messages

6 Cendoor (AI)

The order is confirmed

The AI asks the customer to confirm. You approve it with one tap. Fake or risky orders are flagged.

Fewer refused parcels

WhatsApp sending needs Meta approval; until then one-tap links

7 You

You pack and ship

The label is ready and the best carrier is suggested. Stock is updated on every channel.

You only pack

8 Cendoor (AI)

Delivered and paid

The customer gets tracking updates. Cash on delivery is tracked. Failed deliveries are chased.

Know what carriers owe you

Live carrier data needs carrier access

Advice from your sales
What to restock, what to post

You post. Cendoor does the rest.

Working today in the demo. Sending through WhatsApp, Instagram and ads needs approval from Meta; real carrier tracking needs carrier access. Journey steps marked with a clock depend on that.
