cendoor

You post.
Cendoor does the rest.

AI that confirms cash-on-delivery orders for small Moroccan sellers on Instagram, TikTok and WhatsApp, and builds their shop from a chat.

Pre-seed deck · [date] · [founder name]
cendoor.com

Working demo with fictional data. No customers yet: this deck says what is built, what is proven and what is not.

THE PROBLEM

Small sellers lose money on orders that go silent or get refused

They sell by DM, answer messages late at night, phone each customer to confirm, then ship cash-on-delivery parcels that come back.

20–40%

of cash-on-delivery orders come back

Return or refusal rates quoted by vendors of confirmation tools; some quote over 50%.

Vendor claims (eGrow, YouCan), not independent data.

70–90%

of online orders are paid on delivery

Cash on delivery is how Moroccan customers trust a seller they do not know.

Vendor claims (eGrow), not independent data.

22.8M

social media users in Morocco

Where these sellers find their customers, and where the orders arrive.

DataReportal, Digital 2026: Morocco (October 2025).

THE SOLUTION

Orders confirmed before you ship, in your customer’s language

1. Build

Describe the shop in a chat. The AI designs a site made for you, with your photos, products, delivery and stock. Change anything by talking.

2. Confirm

The AI takes the order in Darija, French, Arabic or English, then asks the customer to confirm. The seller approves with one tap. Risky orders are flagged.

3. Deliver and grow

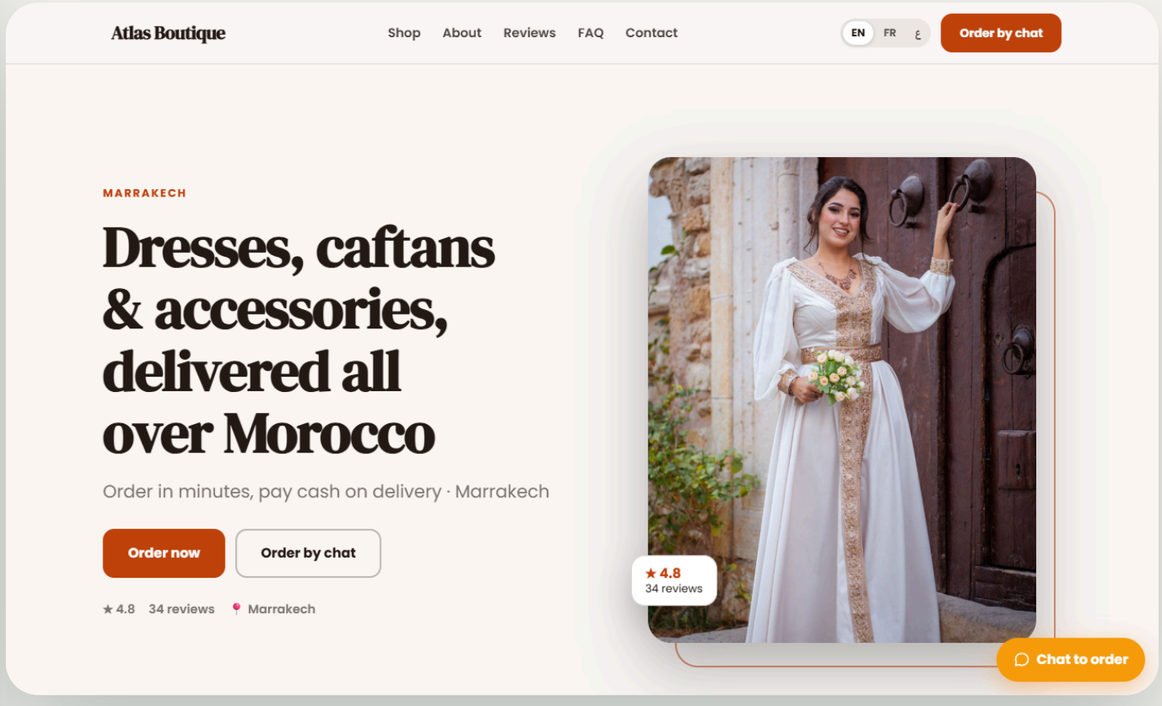

Labels, tracking updates, cash on delivery tracked, failed deliveries chased. Offers to past customers and ads from one button.

Honest status Built and tested in the demo. Sending through WhatsApp, Instagram and ads needs approval from Meta; carrier tracking is simulated.

THE PRODUCT

What the customer sees, and what the seller sees

A shop made for each seller

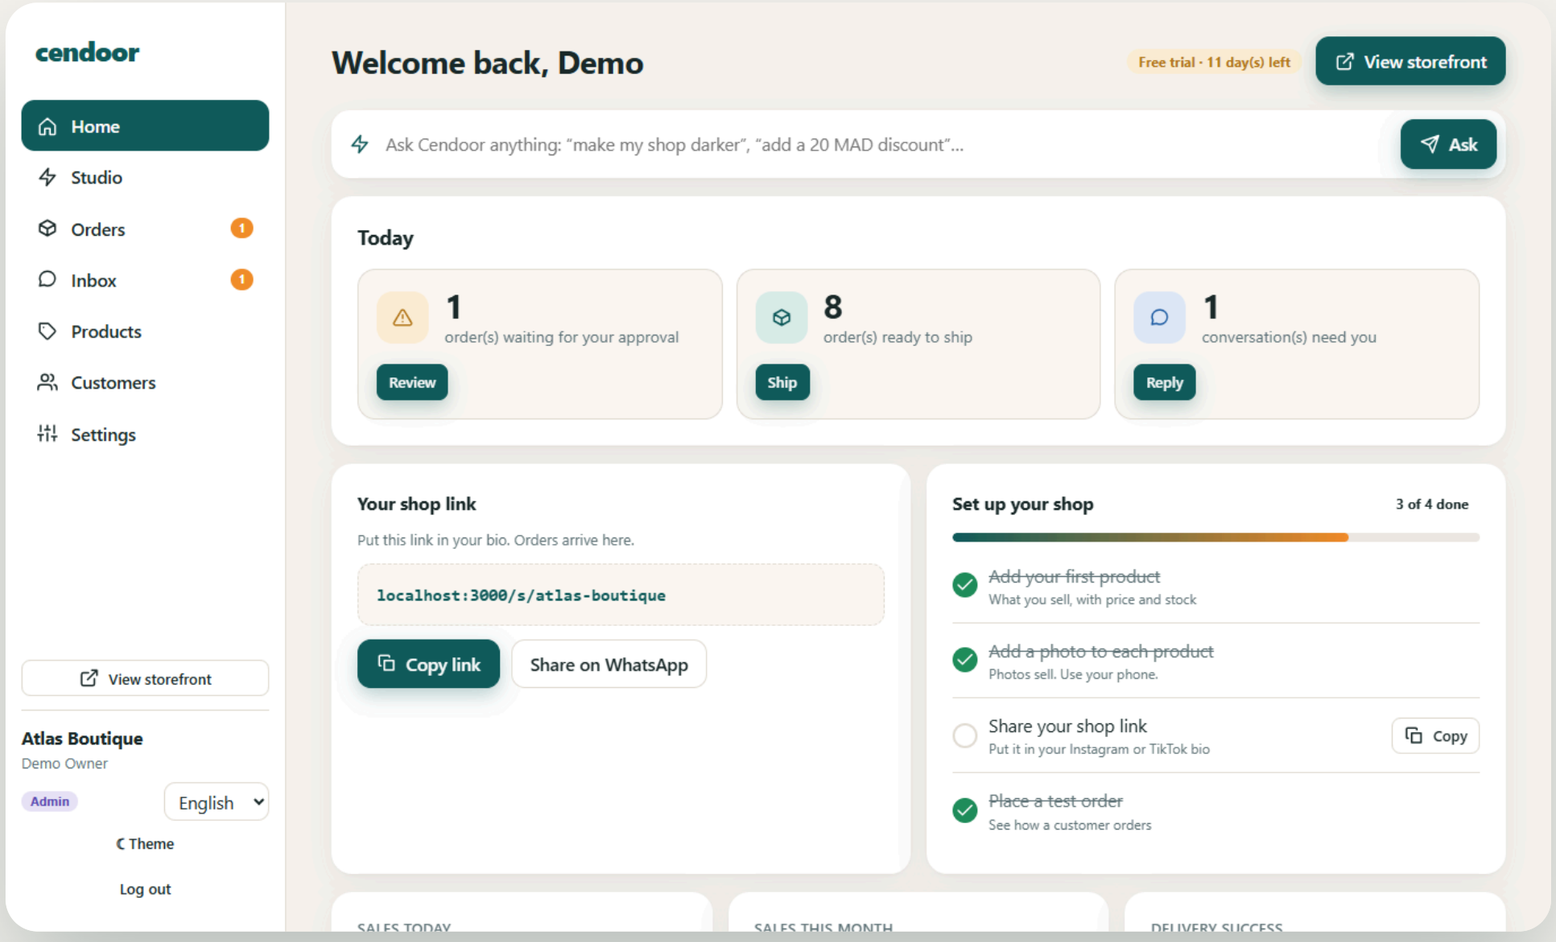

Real photos, cash on delivery, chat to order. Not a template: every shop is generated from the seller's description.

A calm dashboard

Today's tasks first: what to approve, ship and answer.

THE PRODUCT

One screen to run the day

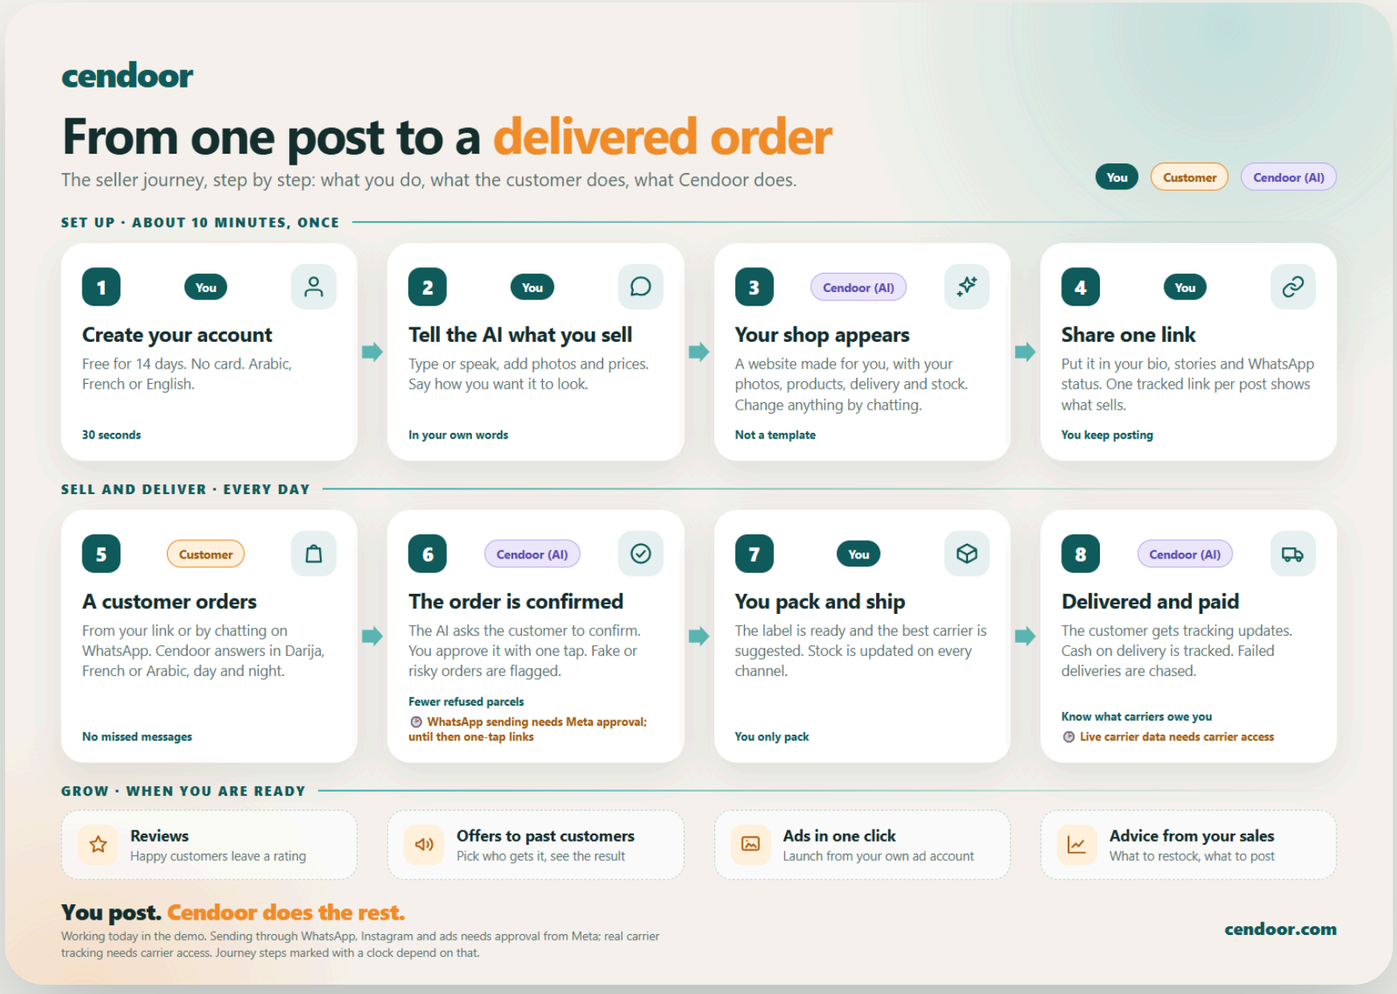

1 Today
One order to approve, eight to ship, one chat that needs you.

2 Your link
One link for the bio; every post gets its own tracked link.

3 Ask Cendoor
“Make my shop darker”, “send an offer to customers in Rabat”.

HOW IT WORKS

From one post to a delivered order

WHY NOW

The channels are there. The tools for small sellers are not.

Social commerce is the storefront

35.5M internet users (92%) and 22.8M social identities in Morocco. Instagram and TikTok audiences grew about 20% in a year.

DataReportal Digital 2026; Morocco World News summary (growth figures not verified at source).

WhatsApp is the order desk

Orders start in a DM and end on a doorstep with cash. Confirmation is the step that decides whether the parcel is accepted.

AI can now do Darija conversations at low cost

Rule-based understanding today, language models for the hard cases. Competitors have started: Babliy launched in June 2026.

MARKET

A real but modest market in Morocco: sized with assumptions, not statistics

	LOW	BASE	HIGH
TAM · sellers on social or messaging	50,000	100,000	150,000
SAM · regular sellers who would pay (30%)	15,000	30,000	45,000
SOM · paying sellers in year 3 (3–5%)	450	1,200	2,250
Revenue at 149 MAD / month	0.8M MAD	2.1M MAD	4.0M MAD

No official count of social sellers exists. 463,383 auto-entrepreneurs were registered at the end of 2025 (DGI, via TelQuel); a minority sell online. All shares above are **assumptions to test with a seller survey**.

What this means

Morocco alone supports a real small business. Investor scale needs **higher revenue per seller** (per-order fees, payments, partners) or **expansion** to similar cash-on-delivery markets, shown with Moroccan evidence first.

BUSINESS MODEL

Subscription per shop, with 85% contribution

Founding 50

99

MAD / month, locked for 12 months for the first 50 sellers. 14-day free trial, no card.

Solo

149

MAD / month. Shop, AI chat, confirmation, labels, tracking, cash. Unlimited orders.

Growth

299

MAD / month. Team seats, more AI design credits, priority support.

Unit economics (estimates, no quotes)

Each paying seller leaves about **126 MAD a month** after messages, AI usage and payment fees (22.8 MAD). Fixed costs about 2,940 MAD a month. **Break-even: 24 paying sellers** (71 with a 6,000 MAD founder salary).

To be tested with real sellers

99 vs 149 MAD, and a per-confirmed-order plan (4 MAD, no monthly fee), the option simulated sellers asked for most.

COMPETITION

Confirmation is already sold. Building the shop too is the open lane.

	BUILDS THE SHOP	AI ORDER CONFIRMATION	DARIJA	PRICE
Cendoor	yes, from a chat	built; WhatsApp sending needs Meta	rules today; to validate	149 MAD
eGrow	no (connects to your store)	**yes, WhatsApp + call center**	AI agent (claimed)	from $59 (~590 MAD)
YouCan Confirm	only YouCan stores	**human agents**	n/a	not found
Babliy (June 2026)	no (WhatsApp agent)	**yes**	**yes (claimed)**	not found
YouCan / Storeino / Shopify	**yes**	apps or none	no	$17–32 (~170–320 MAD)

From public pages read on 2026-10-19; vendor claims are self-reported. “No competitor was seen to generate the shop for a seller who only has an Instagram or TikTok account” is an inference to confirm with sellers. The fastest copy risk: eGrow or Babliy adding a shop builder.

WHERE WE ARE

Built and tested. Not yet proven with real sellers.

114

automated checks pass

Shop builder, chat, orders, confirmation, campaigns, ads flow, security rules. A working demo with fictional data.

5 / 20

simulated sellers would try the offer

Up from 2 of 20 for the plain pitch. Simulated buyers lean agreeable: an upper bound, not a result.

0

real sellers or paying customers

The honest answer. The next 30 days are a free pilot with 3 to 10 real sellers.

Pilot success line 10 of 40 sellers contacted agree to talk · 5 start · 3 confirm 10+ real orders · 3 written commitments at 99 MAD · no serious incident.

GO TO MARKET

Win trust one seller at a time, then let the link spread

1. Talk

Message 10 sellers a day by DM, one by one. Ask how they confirm orders today. No pitch.

2. Pilot

3 to 10 sellers, free for 30 days, with approve-before-send and the founder on their WhatsApp.

3. Founding 50

99 MAD locked for 12 months, refund if no order is confirmed in 30 days.

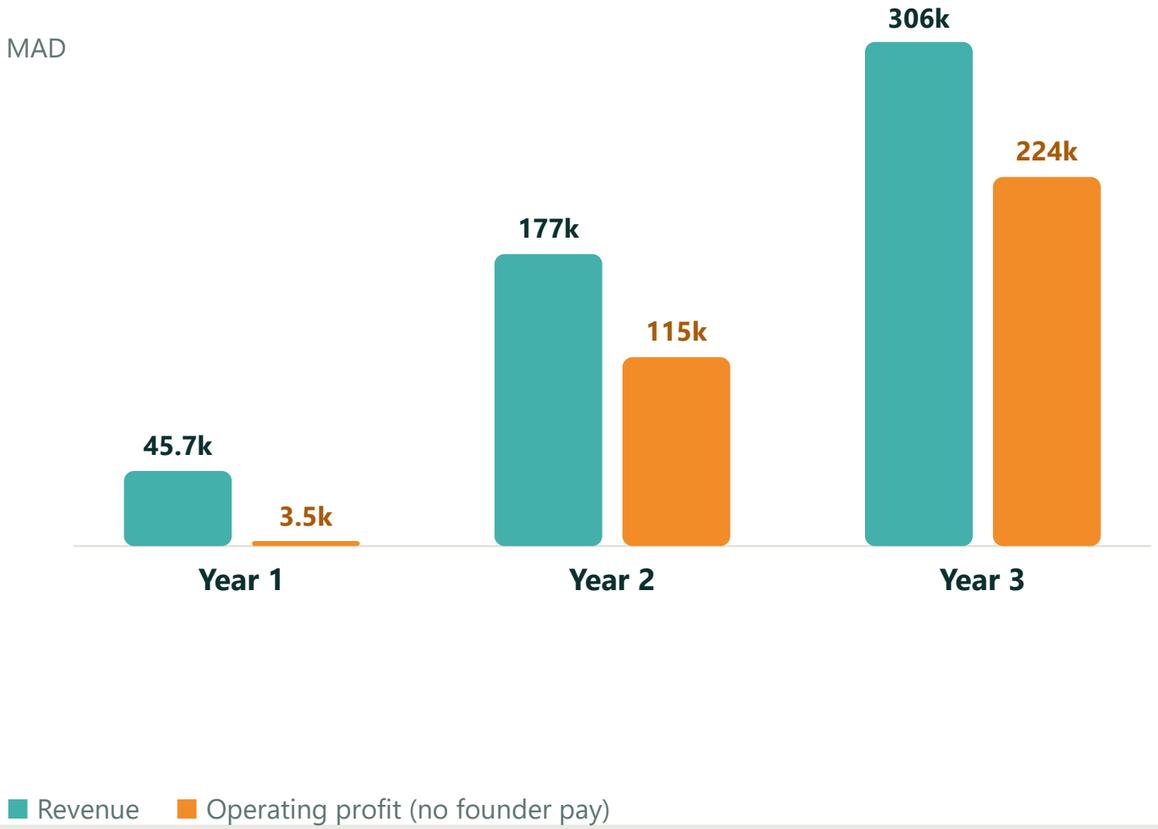

4. Spread

Every shop link says “powered by Cendoor”; sellers refer sellers; short Darija videos on Reels and TikTok.

Budget about 2,000 MAD a month. Most a seller is worth paying to win: about 228 MAD at 99 MAD (3-month payback).

FINANCIALS

What the plan looks like (assumptions, not a forecast)

Reads as

60 paying sellers at month 12 (assumed), then +6 a month. Revenue 45.7k, 177k, 306k MAD. Break-even at month 7. Cash needed before it pays for itself: about **29,800 MAD**.

With a founder salary of 6,000 MAD

Year 1 is about −68.6k MAD, year 2 about +42.6k, year 3 about +151.7k. Break-even rises to 71 sellers.

Source: **financial-model.xlsx** (live formulas) built from the CFO tool. Costs are estimates without quotes; the ramp is not a forecast.

ROADMAP

Prove it, make it reliable, then grow

Weeks 0–6
Prove

- Approve-before-send, kill switch, export
- 3 to 10 real pilot sellers
- Registration and legal basics

Months 2–4
Make it reliable

- WhatsApp approval and templates
- Billing; per-order plan
- 1 to 2 carriers
- Backups

Months 4–8
Grow

- Ads for other sellers (Meta approval)
- Referral loop
- Darija voice notes

Months 8–12
Widen

- Instagram and TikTok messages if approved
- Support hire
- Per-order and partner revenue

RISKS

What could go wrong, and what we do about it

RISK	WHAT WE DO
Sellers do not trust a bot speaking for them	Approve-before-send for 14 days, read and take over any chat, per-shop kill switch
WhatsApp and Meta approvals are slow or refused	Prepared one-tap messages as a fallback; start verification once the company is registered
A competitor adds a shop builder	Focus on proven results for one seller type; lock Founding sellers for 12 months
Data-protection (CNDP, Law 09-08) problems	Lawyer review of terms and privacy before real customers; consent and STOP built in
The founder cannot fund a living while building	Set a minimum income; break-even is 71 sellers with a 6,000 MAD salary; raise or cut marketing first

TEAM

[Founder name]: why this person, for this problem

To complete (the founder only)

• Photo and two lines of background
• Why you know sellers, Darija commerce or cash on delivery
• Who has already advised or helped (names only with permission)

What is true today

The product was designed and built by the founder with AI assistance, including the shop generator, chat engine, order flow and this demo. The company is not registered yet.

Skills to add

A native Darija reviewer, sales and onboarding help, and accounting and legal support in Morocco.

THE ASK (DRAFT)

[Amount and terms for the founder to decide]

Pre-seed use of funds: about 250,000 MAD (~$25k), 12 months

Founder income (6,000 × 12)	72,000
Fixed costs (hosting, tools, accountant, WhatsApp provider, marketing)	35,280
Ad test budget	30,000
Part-time Darija support (6 months)	24,000
Legal, trademark, CNDP	20,000
Startup spend	19,000
Buffer (25%)	50,070

Milestones the money should reach

- 10 pilot sellers with before/after numbers
- 3 written commitments to pay
- Company registered, legal basics done
- WhatsApp approved
- 25 paying sellers

Bootstrap alternative: about 30,000 MAD if the founder takes no income.

cendoor

See it. Then meet the first sellers.
